NEW HOPE-SOLEBURY STEAM HUB

TRANSFORMING EDUCATION WITH STUDENT-DRIVEN DESIGN

An open hub for STEAM activities inspires students of all ages to discover, build, and create. The series of distinct yet interconnected zones foster passion, innovation, and creativity, fulfilling the school district's "profile of a graduate" initiative.

Program elements—including a makerspace, robotics lab, digital fabrication lab, and video production area—are knit together by "the street," a connecting thread that runs the length of the space. Crafted as a dynamic and flexible space, the hub has the capacity to develop and adapt to meet evolving curricular and student needs, preparing students for the world of tomorrow.
